

xmlCIM v2.0 Errata Sheet : 01

Section 3.2.2.2. DECLGROUP

Add the following to Section **3.2.2.2. DECLGROUP**, after the sentence "The objects within the group are CIM Classes, Instances and Qualifiers":

Object declarations must be ordered correctly with respect to the target implementation state. If the DECLGROUP references a class without defining it first, the server must reject it as invalid if it does not already have a definition of that class.

Section 3.2.2.2. DECLGROUP.WITHNAME

Add the following to Section **3.2.2.3. DECLGROUP.WITHNAME**, after the sentence "The objects within the group are CIM Classes, Instances and Qualifiers":

Object declarations must be ordered correctly with respect to the target implementation state. If the DECLGROUP.WITHNAME references a class without defining it first, the server must reject it as invalid if it does not already have a definition of that class.

Section 3.2.2.2. DECLGROUP.WITHPATH

Add the following to Section **3.2.2.4. DECLGROUP.WITHPATH**, after the sentence "Each object is declared with its own independent naming and location information":

Object declarations must be ordered correctly with respect to the target implementation state. If the DECLGROUP.WITHPATH references a class without defining it first, the server must reject it as invalid if it does not already have a definition of that class.
